

Rav's Enrichment Presentation

Sink OS launch event

20/10/2025

2020 MacBook Air running macOS Tahoe

The MacOS UI

It's simple, modern. But also sleek and bold.

It tailors itself to the users needs, and prioritises what needs to be done.

But Just Like Anything In life

There's

FLAWS

What flaws might you ask?

This is my phone

**This is a 6 year hand me
down old Samsung galaxy
A50, that's... also...**

Half my age 🦴

My Phone

It brings me closer to the people I truly care about

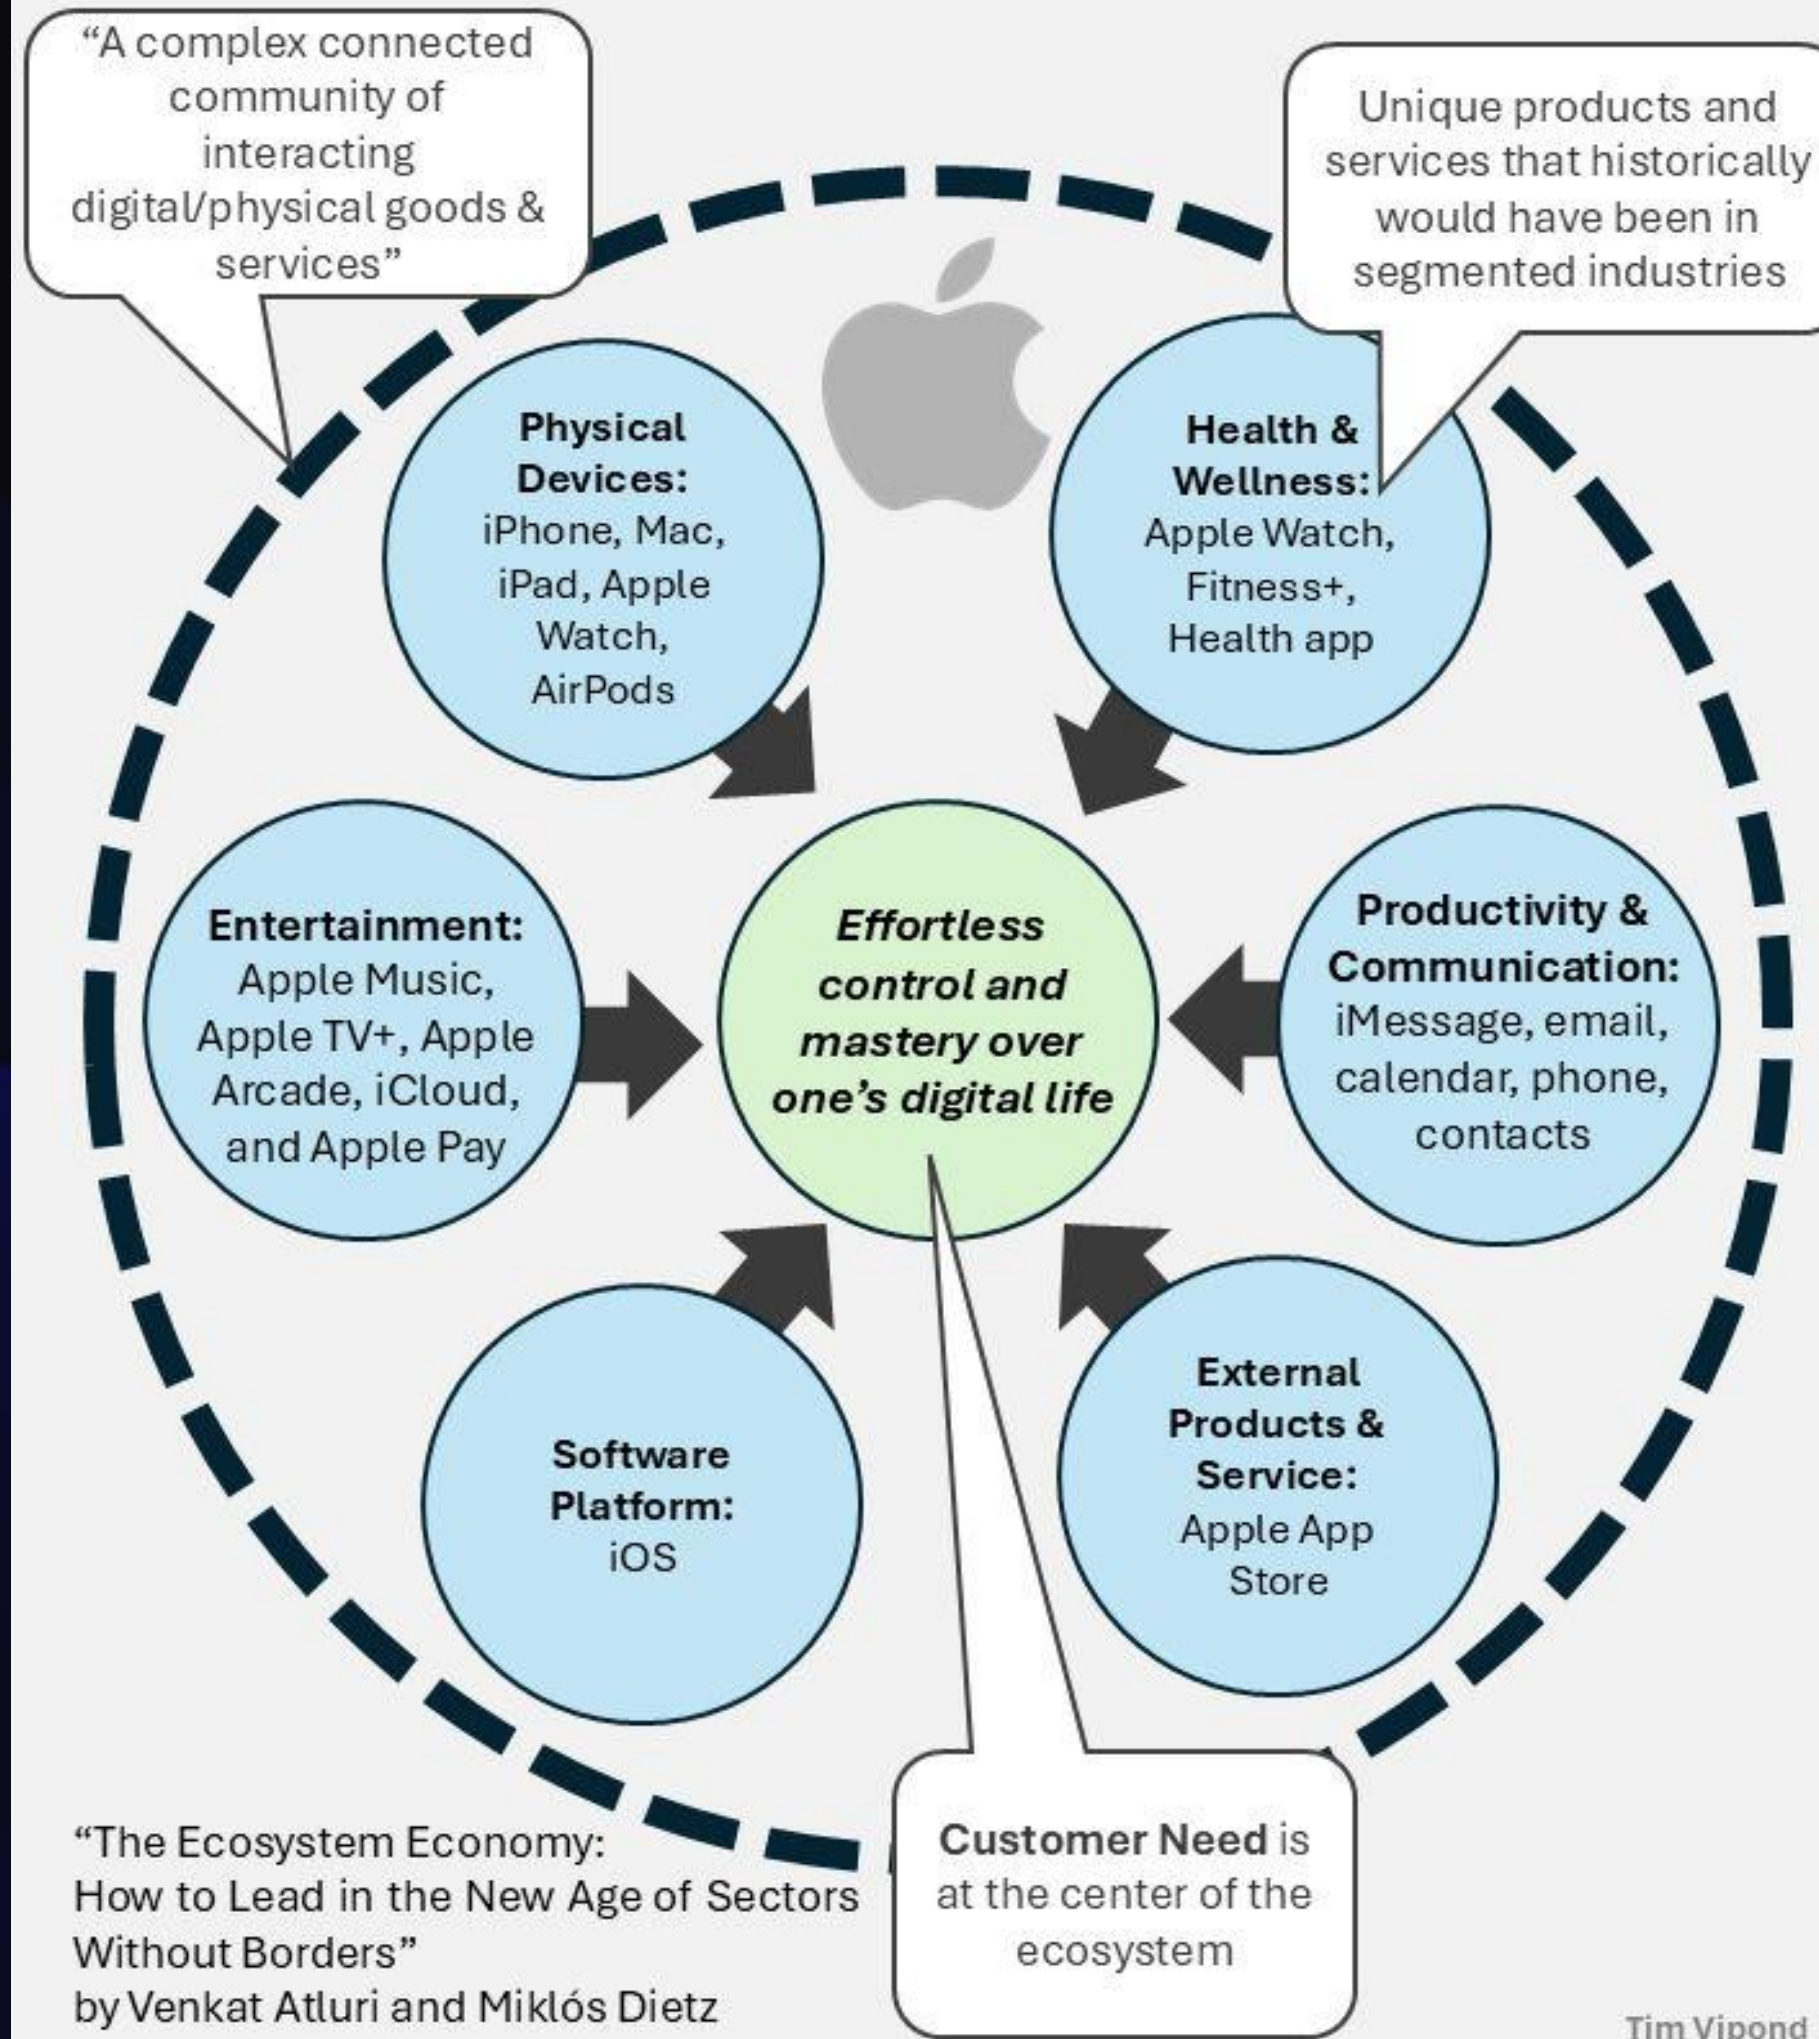

Friends

Family

Or both

The Ecosystem Strategy

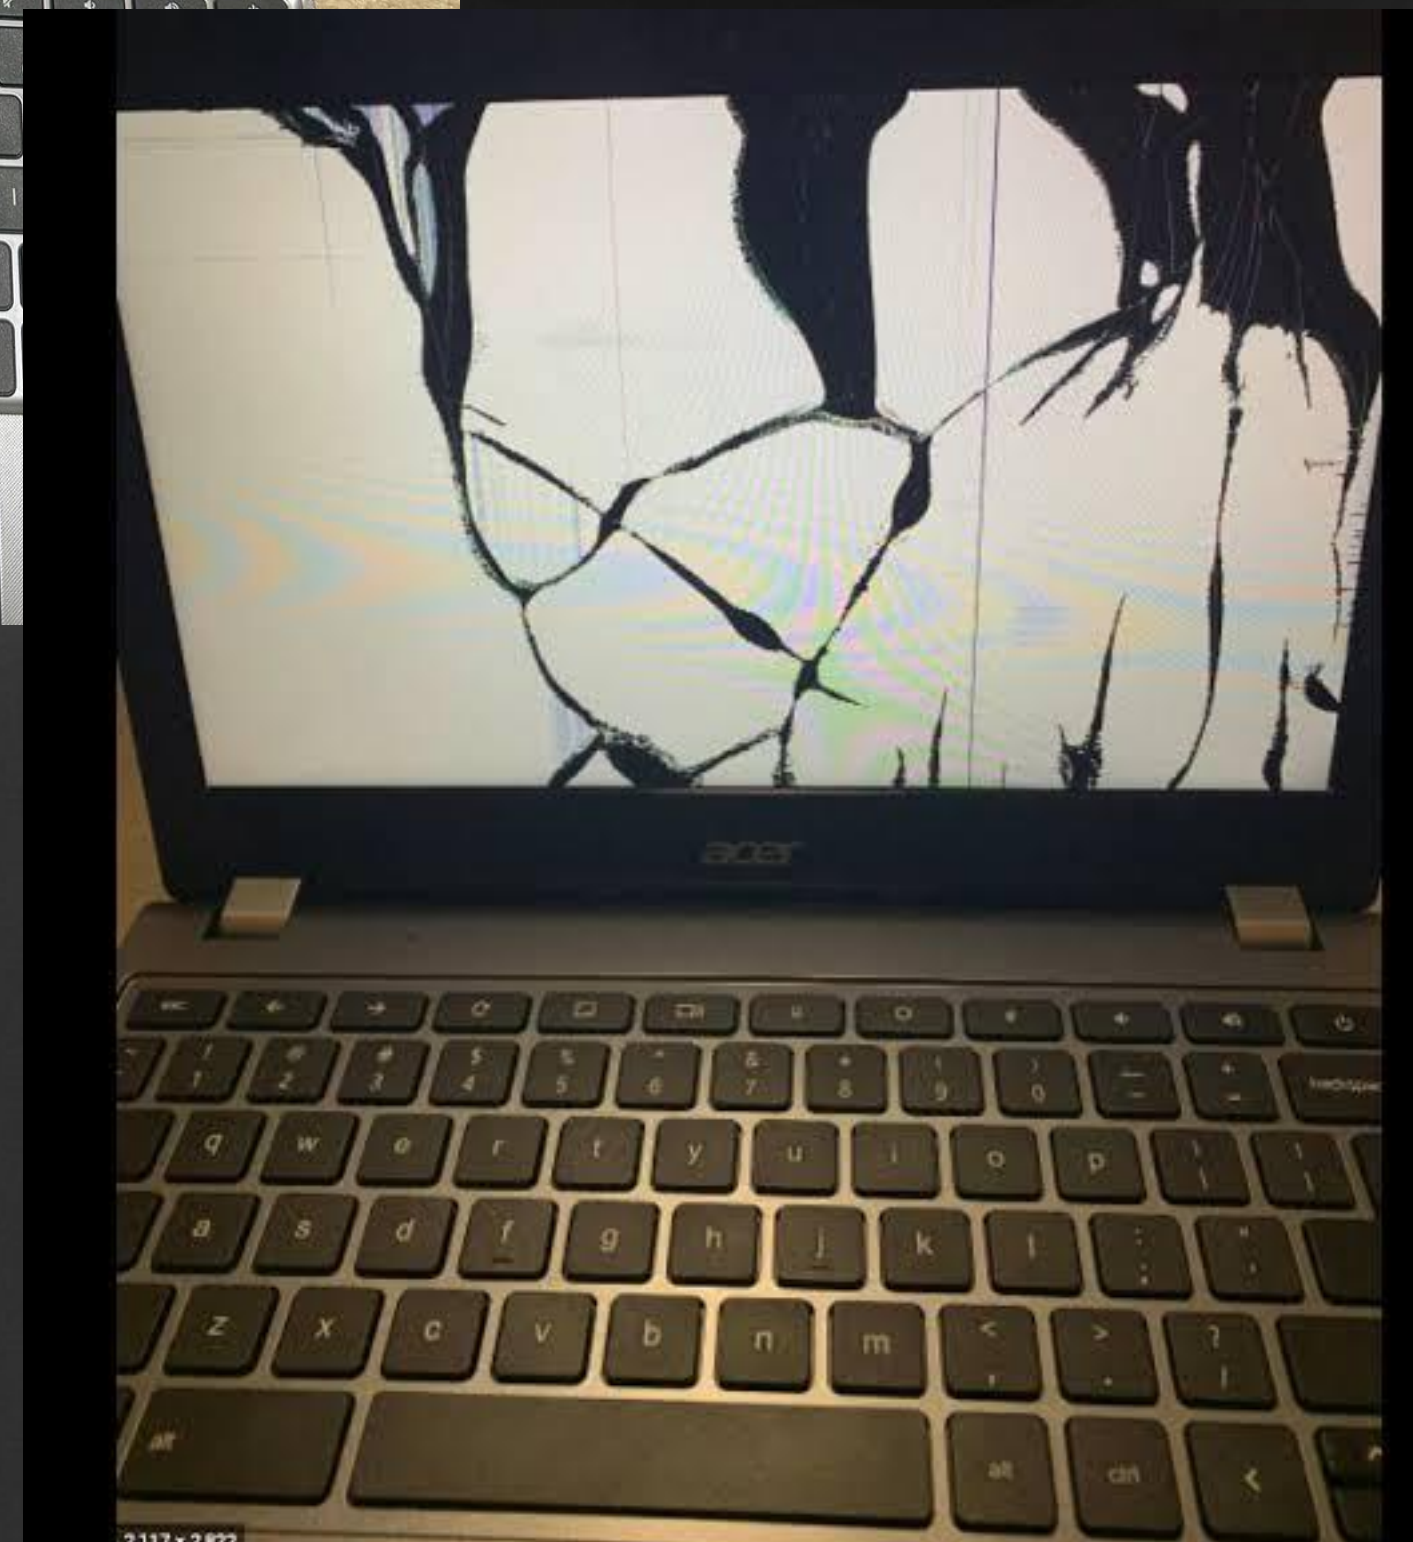

Example: How Apple's ecosystem keeps customers locked in

**And some of us
know**

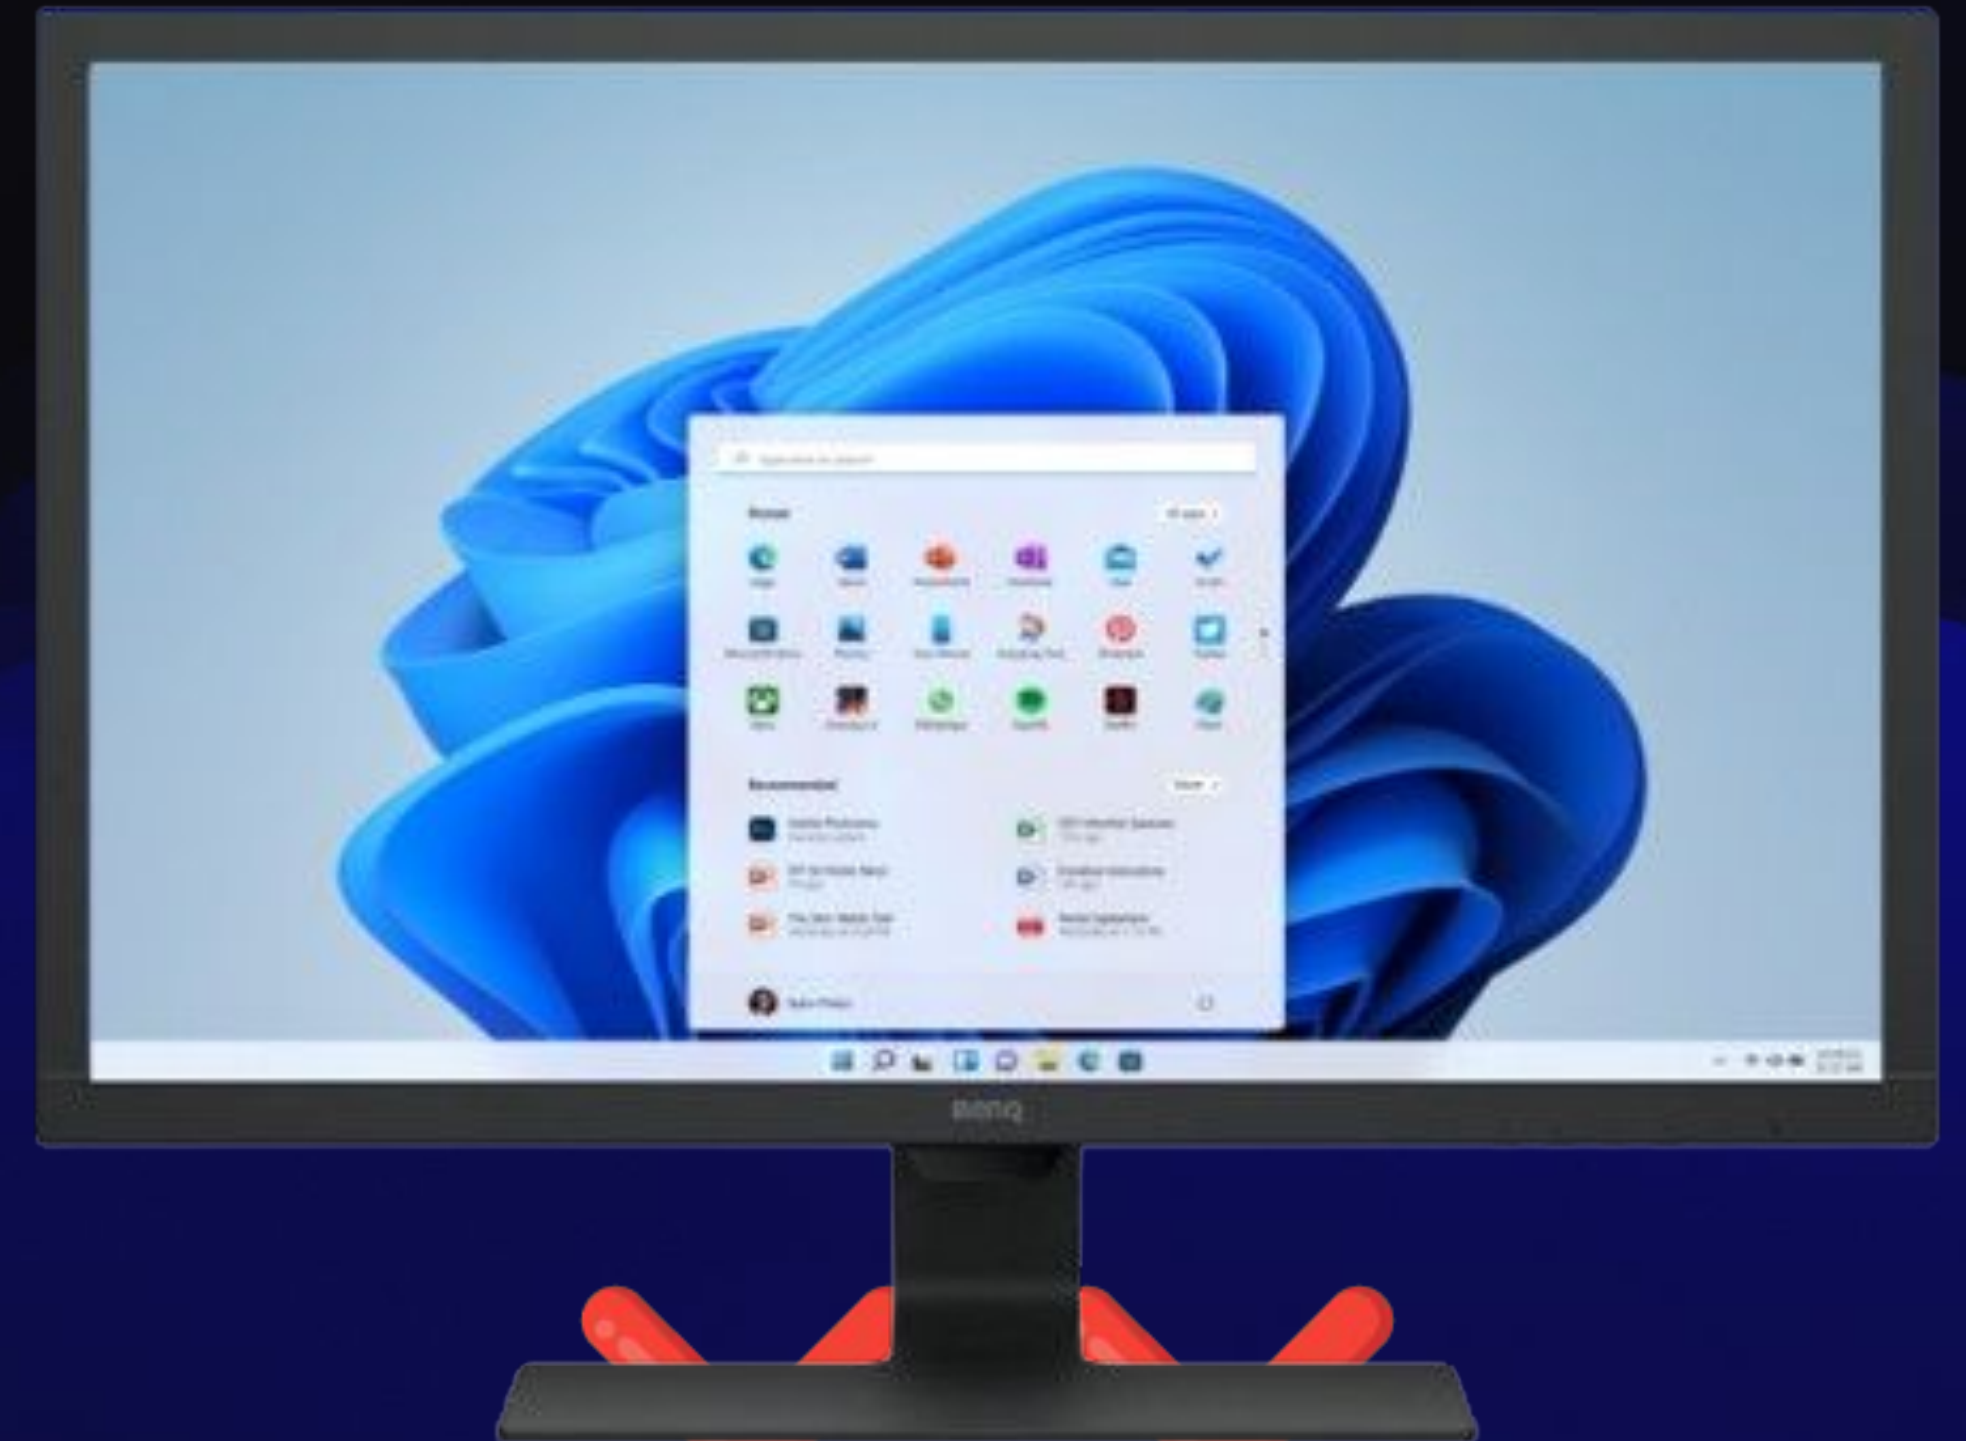

**How bad
Chromebooks are**

How file sharing in apple devices work

The problem with file sharing between Operating systems

(Since Apple made AirDrop they won't be sharing it with their competitors any time soon)

2019 Lenovo thinkbook 14 running windows 11

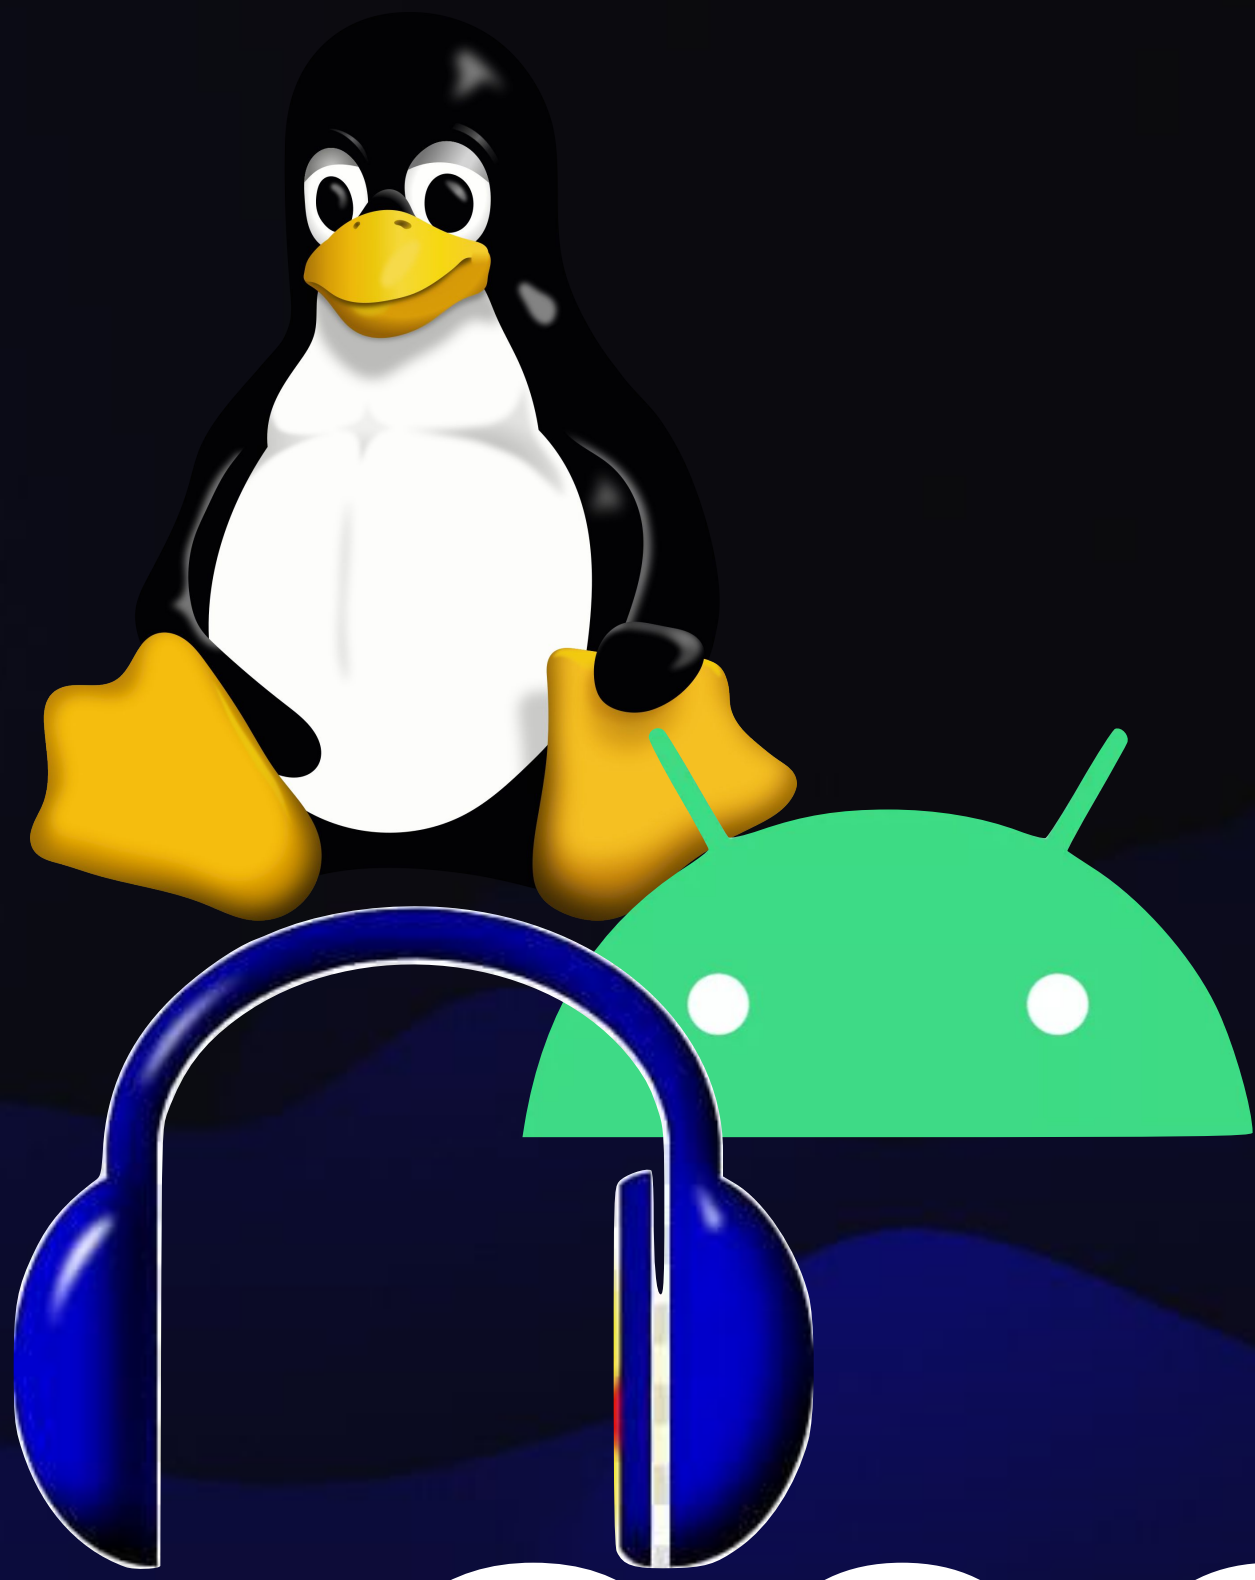

40 years

Windows has been with us for

More than

1.3 billion

Users use windows to get their work or gaming, done

Over

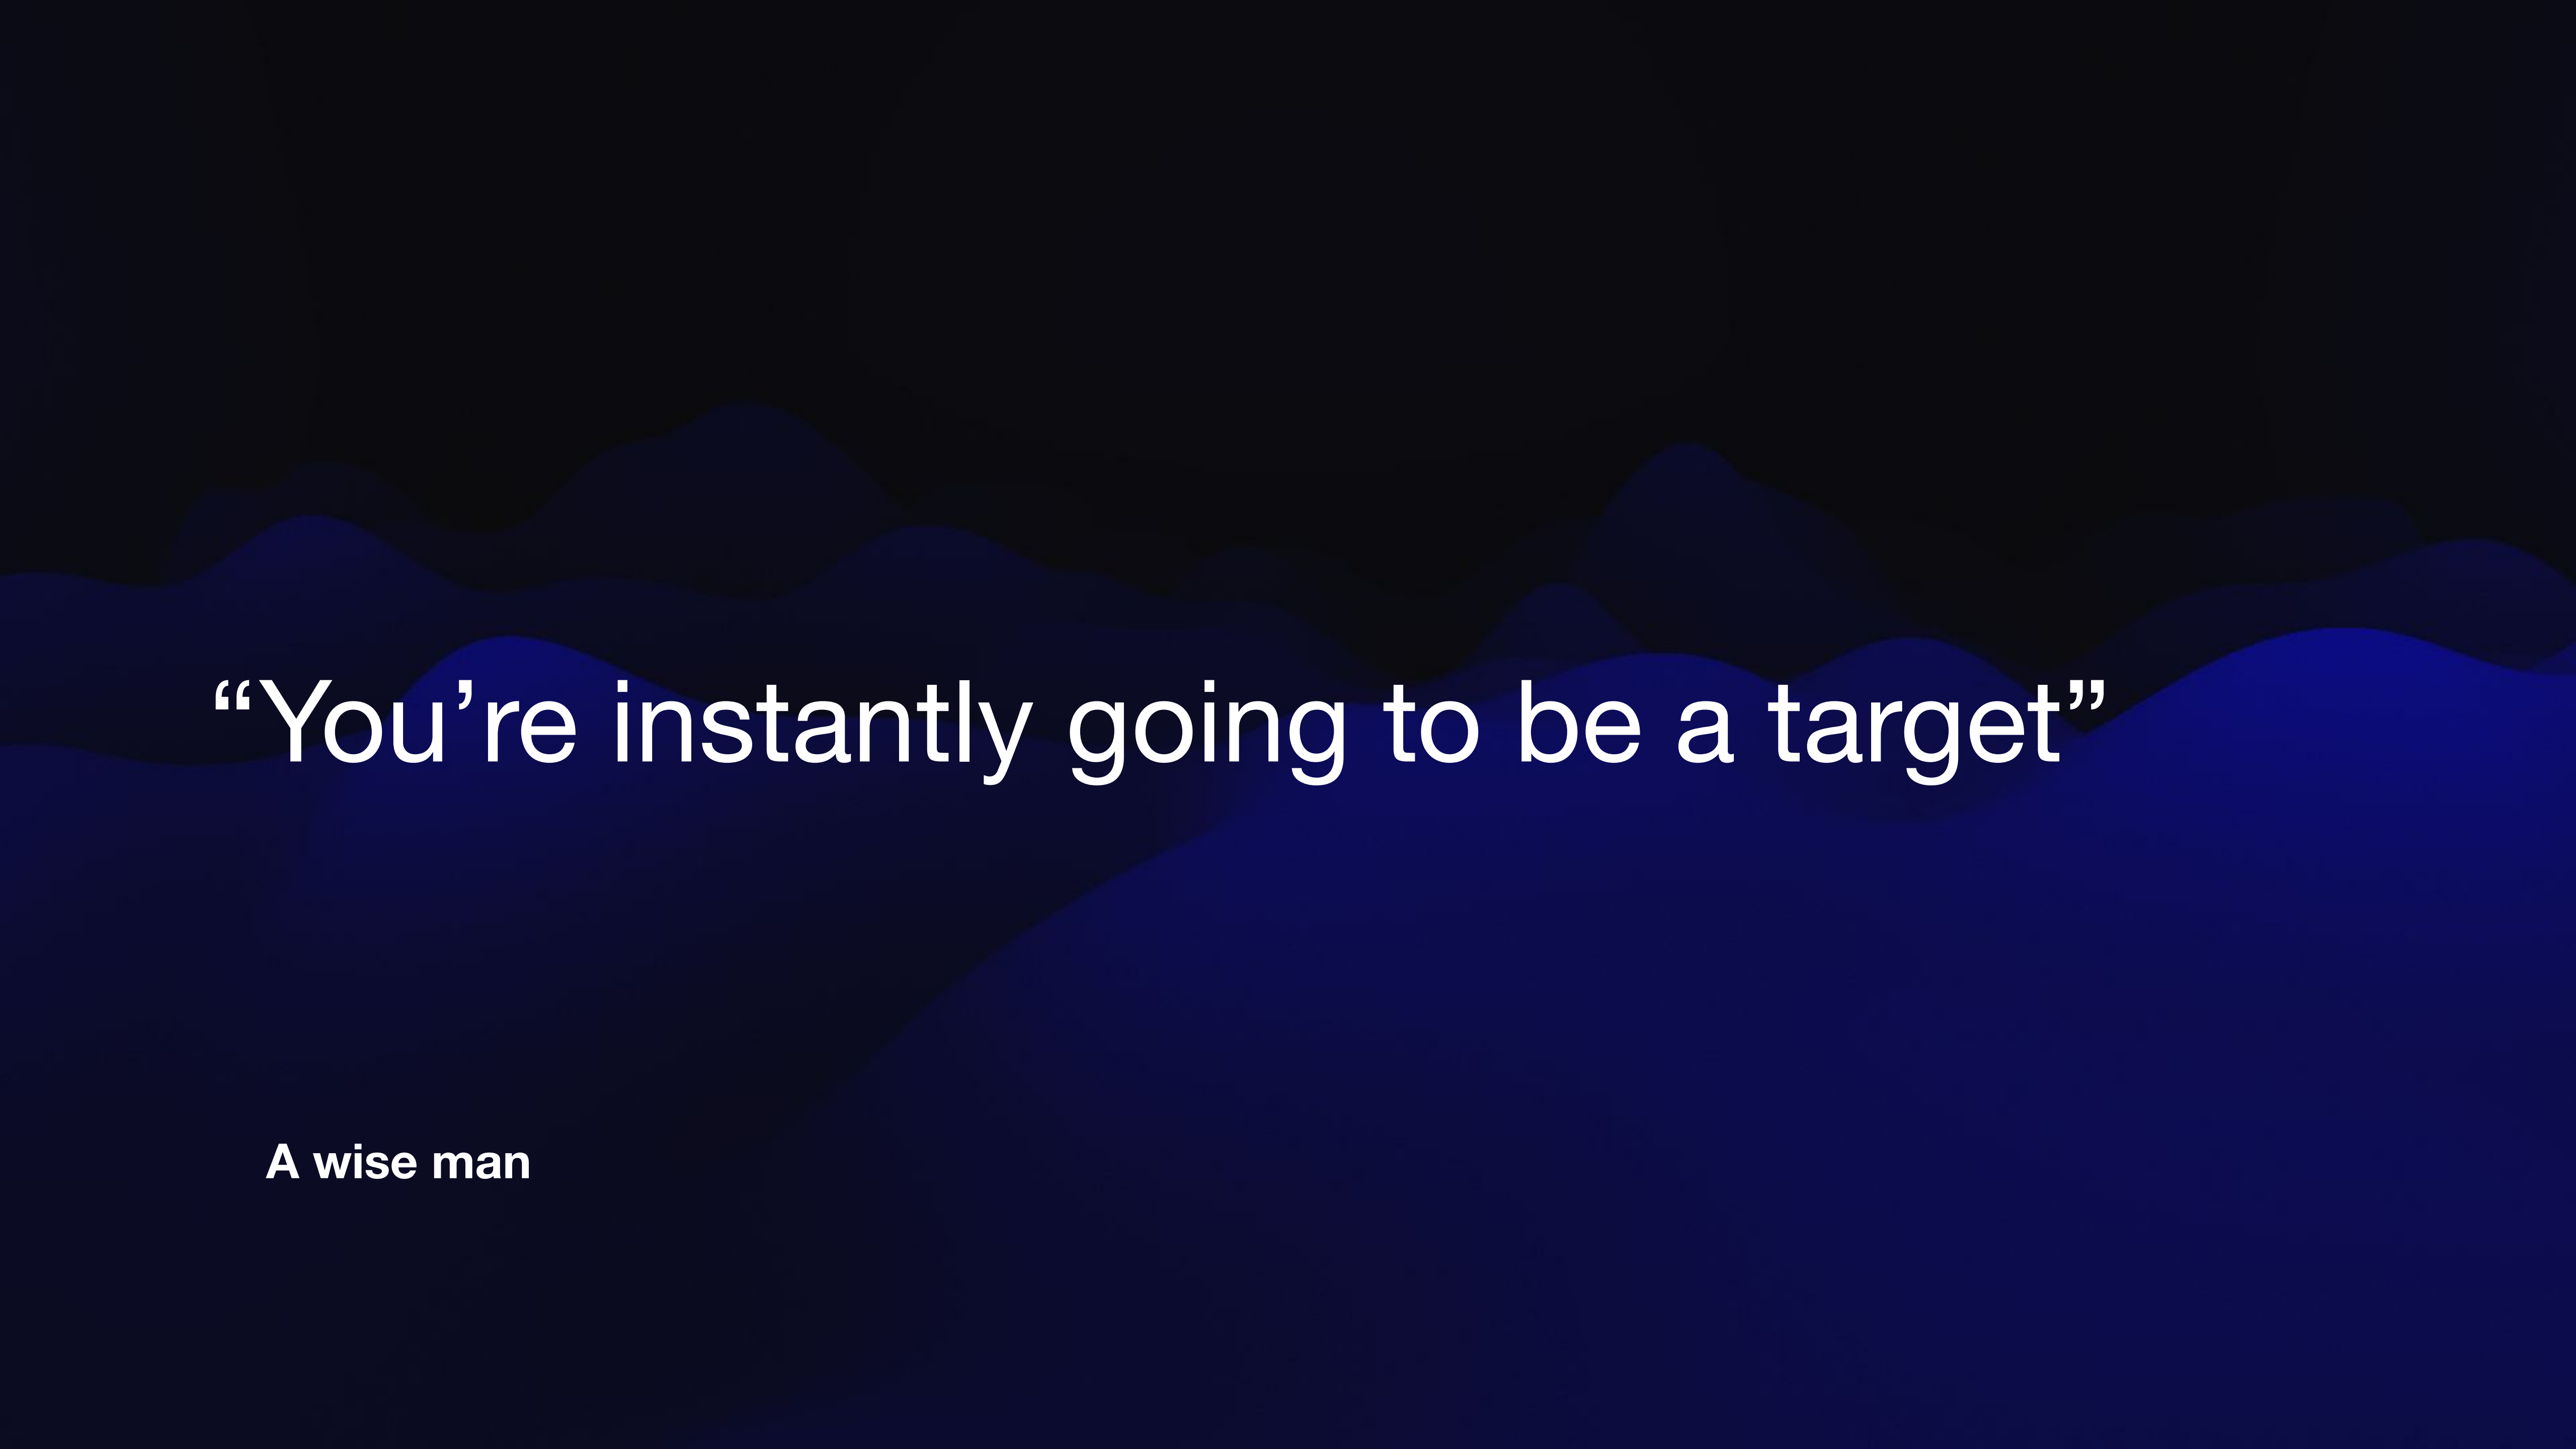

800,000 Apps

On windows are cross platform

Well when your user base is as high as

1.3 billion

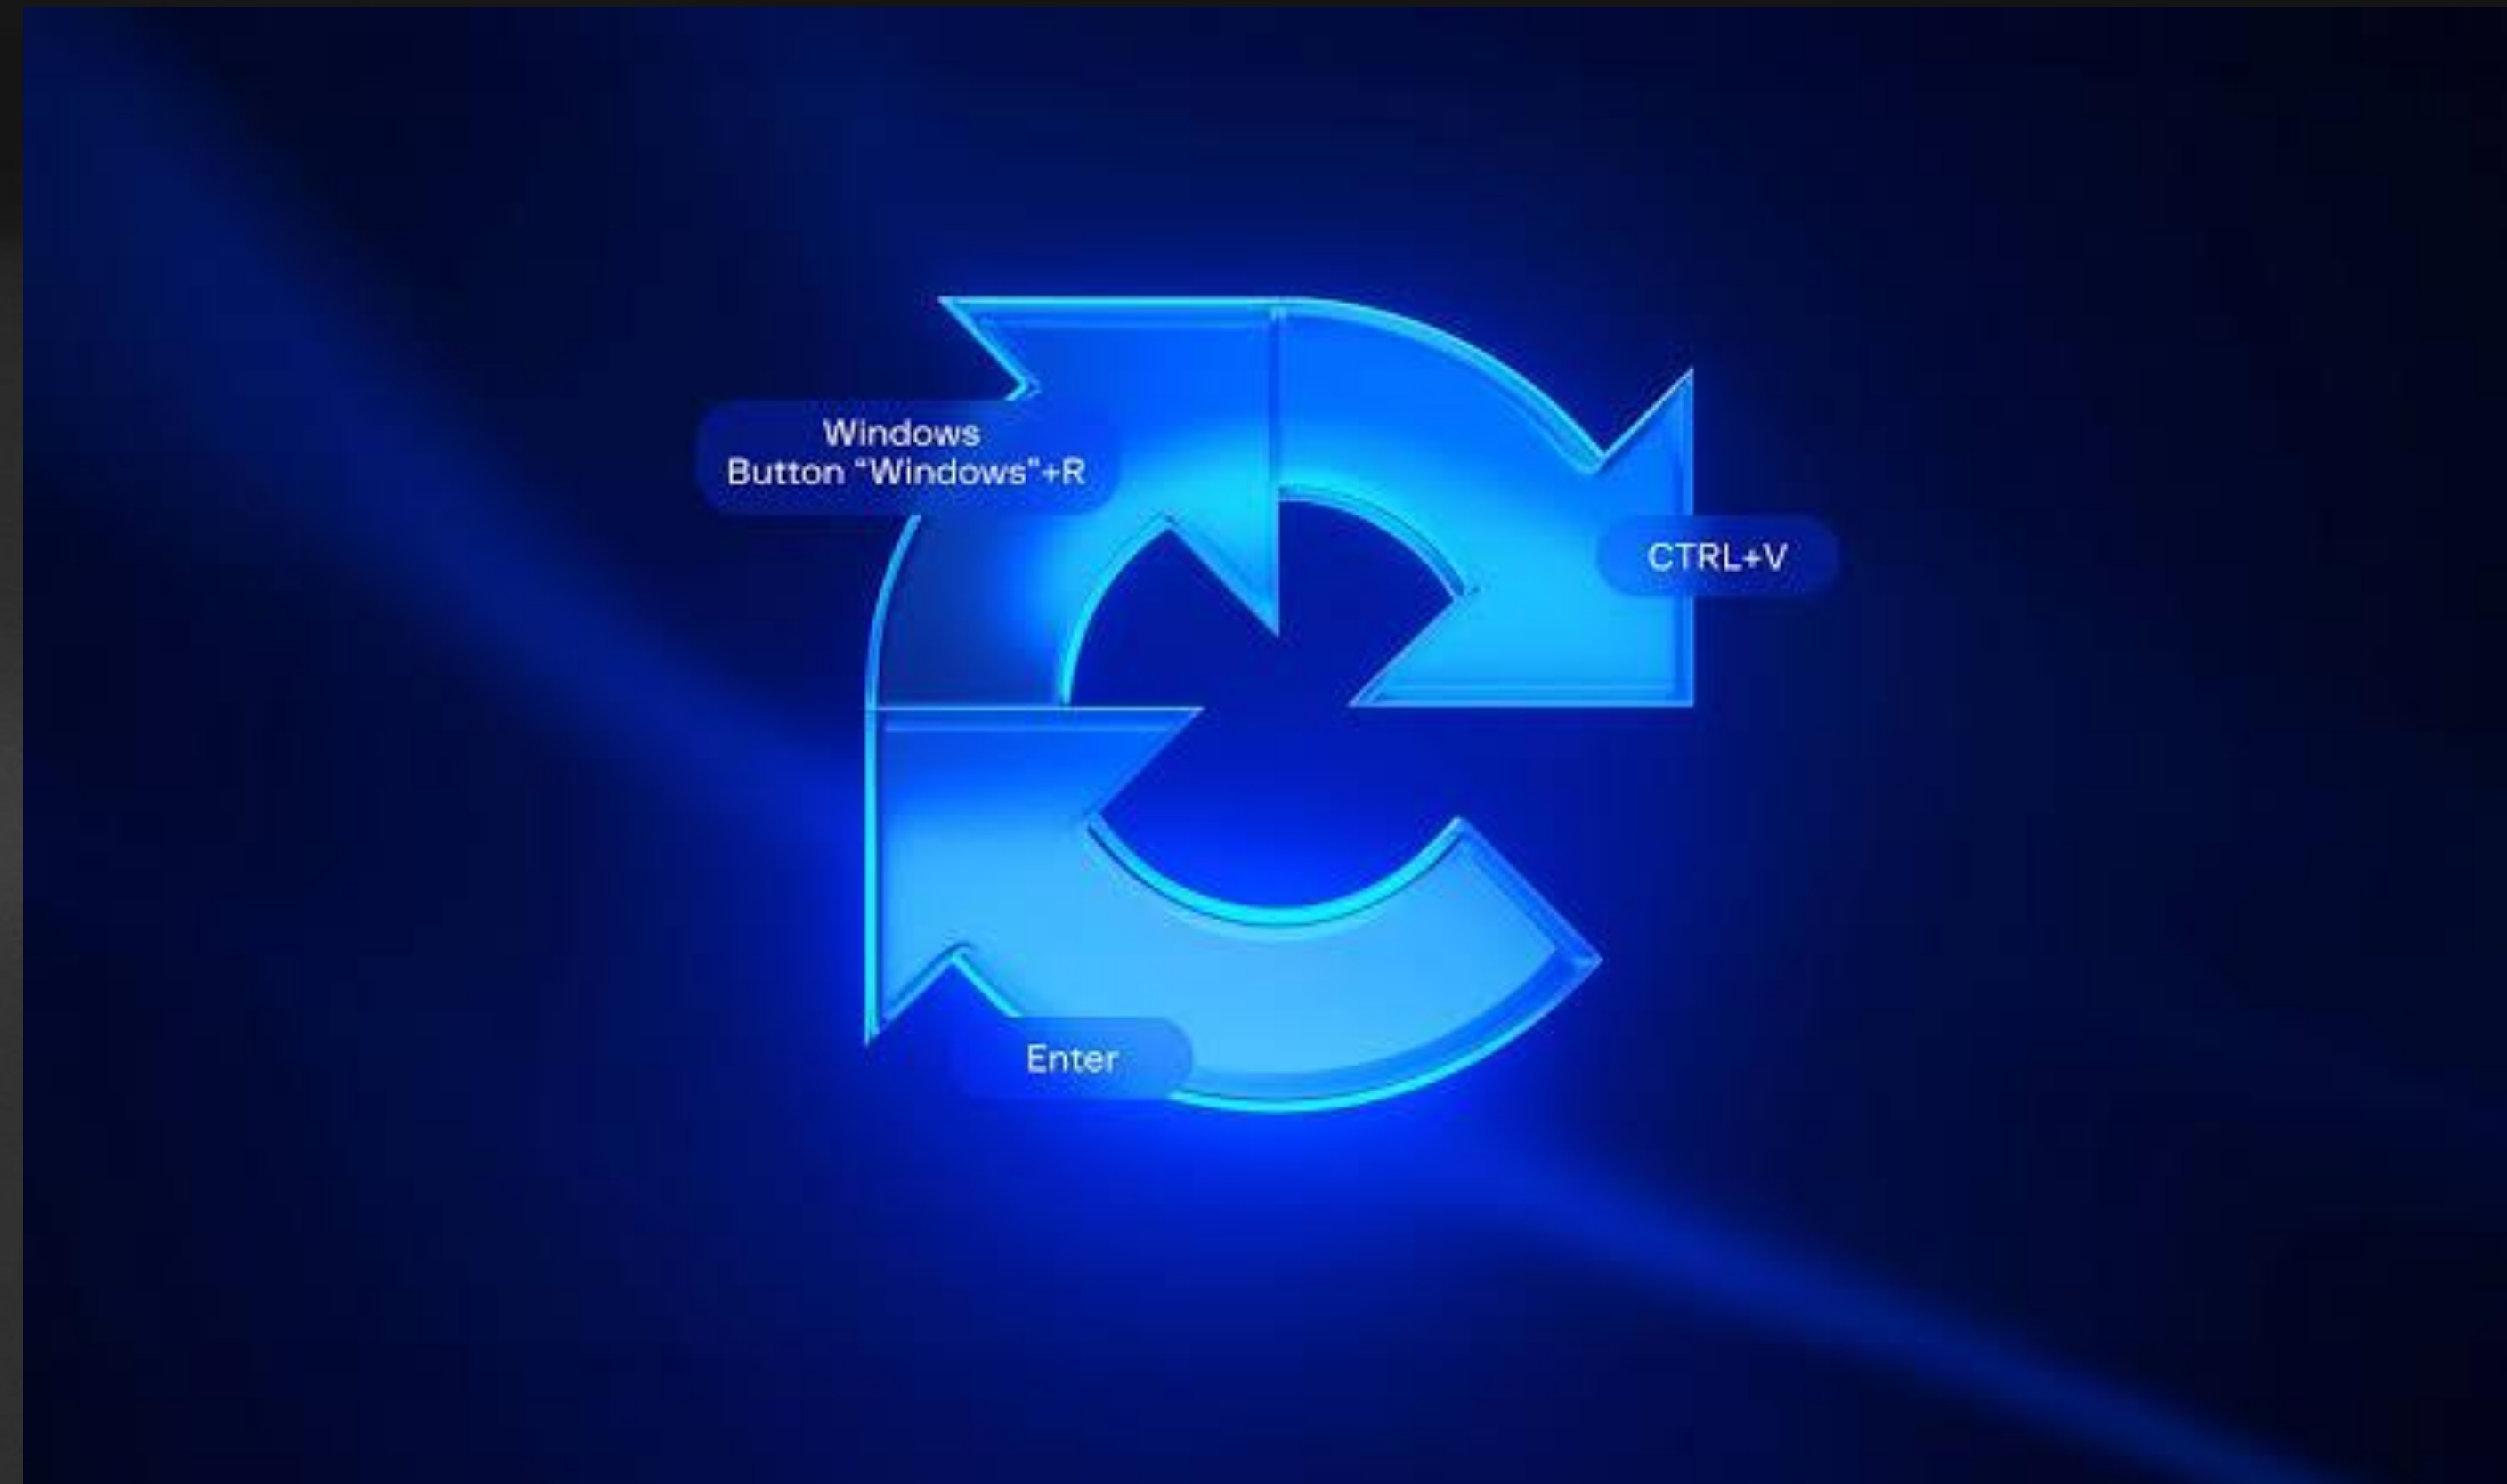

“You’re instantly going to be a target”

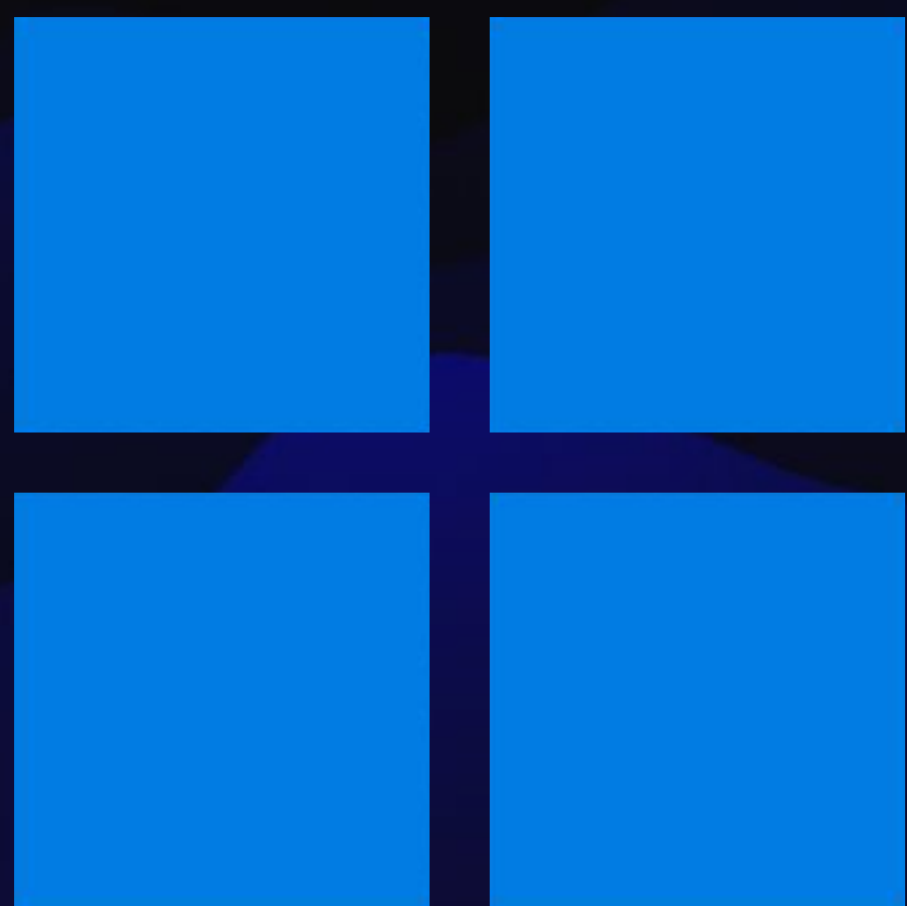

A wise man

Click fix

A new method of hacking

- Fake CAPTCHA (tests to see if you are a robot or not)
- Loyalty tests (rarely)

+

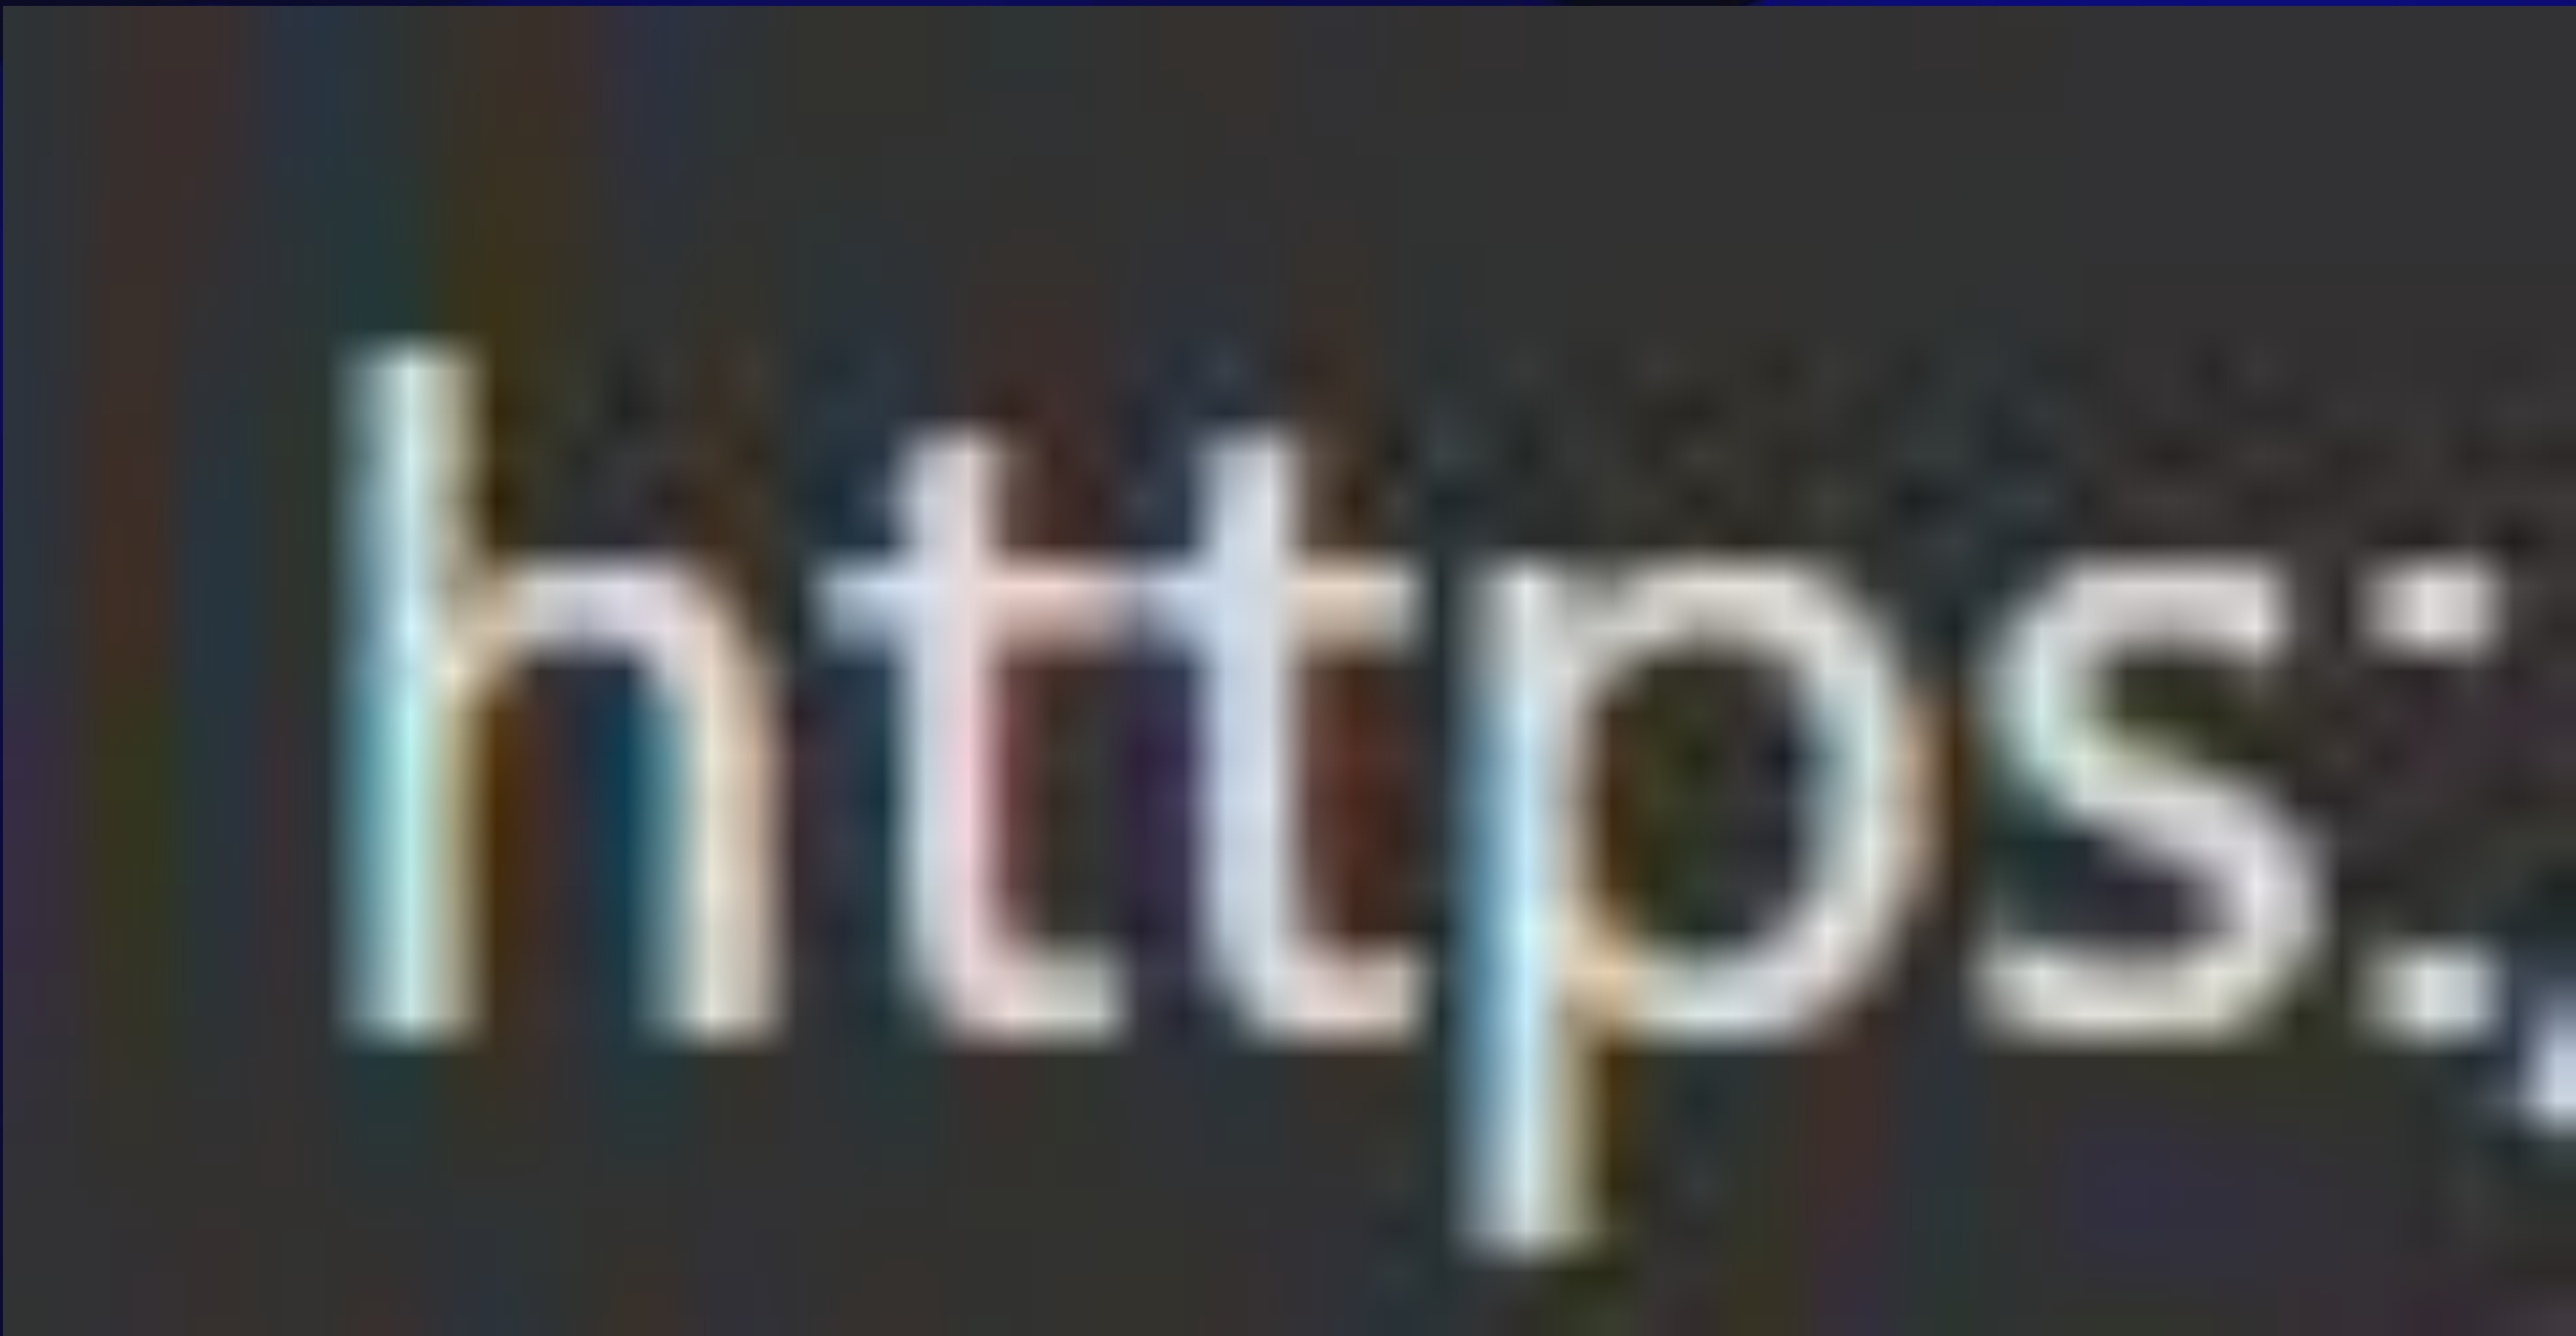

Sink OS

Security

HTTPS

At the start of the URL you will see HTTPS. This stands for Hyper text transfer protocol secure. What this does is encrypt everything you do in Sink OS. I can't see what you're doing, your mother can't see what you're doing and that one freaky man that lives across your street can't see what you're doing

https:

Sink OS safe mode

Sink OS safe mode is the mode in which when Sink OS detects an issue, or something that can lead to an issue, Sink OS will take the User to the Emergency controls, tell the user what happened, and give options to either shutdown Sink OS, restart, or launch into safe mode. Once in safe mode, Sink OS both restricts and eliminates any possible way where outsiders could get into Sink OS

Performance

Browser Performance

Chrome OS

Most popular BrowserOS

Sink OS

Newer Browser OS

Power draw

15W

Bootup time

35s

Browser OS competition

Chrome OS

Time to boot up

12s

Sink OS

- Sink OS is faster
- Browsing on Sink OS is faster
- Sink OS is more efficient

The User Interface

The Lock Screen

- Right as you long in, Sink OS displays the date and time in a minimalistic manner
- With the shutdown and restart buttons at your fingertips, it's easy to troubleshoot issues or turn off quickly

The Home Screen

- You can see that the Sink OS continues the minimalist trend throughout the Lock Screen and Home Screen.
- The icons, right at your fingertips, in the centre, it puts **you** in the centre, whilst maximising productivity

Future Plans

A shift towards Typescript

To maximise security

- The main scripting language is JavaScript. JavaScript, despite being the worlds most used programming language, can be hijacked if the user, server, or both leave an area Vulnerable
- Typescript is a complex programming language made by Microsoft, it's more secure, reducing the chances of a successful hijacking attempt.

TS

Listening has never felt better

Sink OS + Spotify

- Coming next year, users of Sink OS will be able to sign in, listen and save all the playlists, songs and podcasts that they were listening on Spotify via Sink OS
- This helps users set the mood and improve productivity within Sink OS

Hello integrated AI

Sink OS + Copilot

- Maximise your productivity with Sink OS + Copilot.
- Get answers to questions quickly, communicate with your voice, generate beautiful images with Microsoft Copilot, built into Sink OS

Ooooh! New themes

yes. New themes

- Sink is will be receiving new themes.
- Customise Sink OS to your needs (or wants, whatever you prioritise first)

Farewell

Thank you all for coming and listening.
